 Without, opposite the square Church.

TO WATER-COMPAIES AND PLUMBERS
HIGH-PRESSURE COCKS AND
 CLOSURES

The Health of Towns Commissioners having recommended the
 adoption of the high-pressure principle to all towns, WARNER'S
 HIGH-PRESSURE COCK is recommended as a Cock free from
 leakage, and applicable for all purposes and situations. Patent
 Cocks and Valves with supply-valve for attaching direct to main
 pipes without a cistern, cocks, or wire.
LEAD, IRON, and TIN PIPE
 JOHN WARNER and SONS, Manufacturers, 8, Crescent,
 Jervis-street, London.

Series 1. No. 2. No. 3.
NEW REGISTERED CENTRES FOR PARQUET FLOORS,
 AT REDUCED PRICES.

The above and other designs are manufactured and laid down in London and its environs at 1s. 6d. to 2s. 3d. per square foot, including all expenses.

PARQUET BORDERS.

As already advertised. These are now also let in level with oak or deal floors, without removing the old boards.

PATENT VENEERED BORDERS.

In Wainscot, Walnut, and all kinds of Fancy Woods, laid down level with the carpets, at exceedingly moderate prices. By this system a room of any size can be completed in the space of a week.

PATENT VENEERED CEILINGS, WAINSCOTINGS, AND SUBBASINGS,

For Churches, Chapels, Halls, Libraries, Galleries, &c. (varnished or French polished), manufactured and fixed at half the usual cost.

N.B. THESE ARE PERFECTLY IMPENETRABLE TO DAMPNESS.

Specimens and Designs of Parquet Floors and Borders, Ceilings, Wainscotings, &c. may be inspected by Architects (between the hours of Eleven and Four), at the Office of THE LONDON PARQUETRY, 8, WHITEPRIARS-STREET, CITY.

JENNINGS'S INDIA-RUBBER TUBE CLOSET,

FITTED WITH MR. UNDERHAY'S PATENT WATER REGULATOR.

This Regulator in shape is like a small drum, but having solid ends, with India-rubber sides. It is fixed in the box A. The lifting of the closet-handle raises the top of the Regulator, and inflates it (like raising the top of an accordion). Although the closet-handle be immediately dropped, the supply to the Basin is the same, as the service-cock is kept open till the air has been exhausted from the Regulator by the pressure of a weight in connection with the closet-handle, and the desired quantity of water is regulated by the escape of air.

GEORGE JENNINGS having taken a license from the patentee to use this Regulator, is now enabled to dispense with the feed-cistern and ball-cock, making the India-rubber Tube Closet still more simple, and as easy to understand and fit as a cock to a sink, SAVING FULLY FIFTY PER CENT. IN PLUMBERS' WORK.

MANY THOUSANDS of Jennings's India-rubber Tube Closets ARE IN USE, and giving the greatest satisfaction. Upwards of FORTY of these Closets were fixed under the transept of the Exhibition Building; they never require repair or attention; they gained the Prize Medal, and a testimonial from Messrs. Fox, Henderson, and Co.

JENNINGS'S EARTHENWARE WATER-CLOSET.

This Closet has been most favourably received, and in blue or white ware, fitted with one of Jennings's Self-closing Stool-cocks, with sunk plate and ivory handle, looks equal to the best Vales or Pat Closets, and is more efficient.

The Water-closet and Trap being complete in one piece of earthenware, the usual expensive Lead Trap is saved. This Closet is imperishable, and, being free from all machinery, it is noiseless.

The following prices bring them within the reach of all classes:—

In Brown Stone Ware, enamelled white inside	16s. each.
In White Stone Ware	18s. "
Blue Printed Rich Pattern	21s. "
Richly Enamelled, with Gilt Scroll Ornaments	25s. to 30s. "

JENNINGS'S SELF-CLOSING STOOL-COCKS,

For supplying the same with Plain Flat Plate and Handle	12s. each.
With Sunk Plate and Ivory Handle	18s. "
With extra large Sunk Plate, and large Ivory Handle	19s. "

By adapting Mr. Underhay's Regulator, and using a double-seated Valve, George Jennings is enabled to offer to the notice of Architects one of the most simple Self-acting Water-closets ever produced. It is free from all complication, and only requires to be seen to be approved.

The City Militia Barracks have just been fitted with these Self-acting Closets. They waste no water, yet give the required supply, and are free from all noise.

G. J. is now preparing ONE HUNDRED OF THESE CLOSETS, for the New Westminster Workhouses, and two other public Buildings.

JENNINGS'S INDIA-RUBBER TUBE, BIB, BALL, OR STOP COCKS,

For all purposes, will be found more simple and more durable than any other.

JENNINGS'S NEW BELL TRAP

Is well worthy the attention of Architects; it is not liable (like the old Bell Trap) to become stopped, and when the grating is removed it still remains a trap.

The foregoing articles can be had through any plumber, or from the Inventor and Patentee.

GEORGE JENNINGS, ENGINEER AND GENERAL BRASS-FOUNDER,
 20, GREAT CHARLOTTE-STREET, BLACKFRIARS-ROAD, LONDON.
